

A Total Human Resource Managed Outsourced Solution

It's what outsourcing is all about...

Flex HR, Inc. | www.FlexHR.com | 770.814.4225

Our Core Competency is HR

Flex HR is an unparalleled service that simplifies the maze of human resources tasks and demands into a repeatable, predictable, scalable, and sustainable process. We are the middle market, single source solution for HR and payroll outsourcing.

In support of a client's initiatives, we uniquely combine the expertise of our executive level HR professionals with state of the art management communications technology, all managed through our Customer Centric Center.

Our Customer Centric Center is staffed by HR and Payroll professionals, who have the single goal of providing the most responsive management of your HR administration. The extraordinary combination of expertise, technology, and responsiveness combines to form a powerful asset that may be leveraged to position your company to compete and win.

With overwhelming changes in HR compliance, it is virtually impossible for mid-size companies to maintain necessary expertise in-house. Our platform allows management to have control, without co-employment leasing. Flex HR is a world class HR management system that cares about your employees, and is price affordable. Your company and employees can enjoy the benefits of HR services previously only available to large companies.
